Cohen & Steers Global Realty Shares—Class I

Cohen & Steers is a leading global investment manager specializing in real assets and alternative income, including real estate, preferred securities, infrastructure, resource equities, commodities, as well as multi-strategy solutions. Founded in 1986, the firm is headquartered in New York City, with offices in London, Dublin, Hong Kong, Tokyo and Singapore.

Important Risk Considerations: Investing involves risk, including entire loss of capital invested. There can be no assurance that the investment strategy will meet its investment objectives. Diversification is not guaranteed to ensure a profit or protect against loss. Since the Fund concentrates its assets in **global real estate securities**, an investment in the fund will be significantly impacted by the performance of the real estate markets. Risks of investing in REITs are similar to those associated with direct investments in real estate securities, including falling property values due to increasing vacancies, declining rents resulting from economic, legal, tax or political developments, lack of liquidity, limited diversification and sensitivity to certain economic factors such as interest rate changes and market recessions.

Special risks of investing in foreign securities include (i) currency fluctuations, (ii) lower liquidity, (iii) political and economic uncertainties, and (iv) differences in accounting standards. Certain foreign securities may represent small- and medium-sized companies, which may be more susceptible to price volatility and less liquid than larger companies.

Dividend income that the Fund receives from REITs will generally not be treated as qualified dividend income and therefore not be eligible for reduced rates of taxation. Distributions are subject to recharacterization for tax purposes. **The final tax treatment of these distributions is reported on the 1099-DIV forms, which are mailed to shareholders after the close of each fiscal year.**

The FTSE Nareit Equity REITs Index contains all tax-qualified REITs except timber and infrastructure REITs with more than 50% of total assets in qualifying real estate assets other than mortgages secured by real property that also meet minimum size and liquidity criteria.

The FTSE EPRA Nareit Developed Real Estate Index-net is an unmanaged market-capitalization-weighted total-return index, which consists of publicly traded equity REITs and listed property companies from developed markets and is net of dividend withholding taxes.

The S&P 500 Index is an unmanaged index of 500 large-capitalization stocks that is frequently used as a general measure of U.S. stock market performance.

An investor cannot invest directly in an index, and index performance does not reflect the deduction of fees, expenses or taxes.

Percentages may differ from data in the Fund's financial statements due to the effect of fair value pricing of foreign securities. The fund implements fair value pricing when the daily change in a specific U.S. market index exceeds a predetermined percentage. In the event fair value pricing is implemented on the first day of the period, the fund's return may diverge from the performance of its benchmark, which is not fair valued. This divergence is usually reduced on the day following the implementation of fair value pricing by the fund, as the value of the securities in the index that are held by the fund typically move closer to the fund's fair valued price when the market reopens.
